Tel.: 9871869863, 9910979863 | Email : girrajjichildrenhospital@gmail.com

### CASE SUMMARY

Patient's Name	Babyof HEMA	IPD No.	5036
S/O	MOHAN	UHID	20/00 13723
Address	FIROZ GANDHI ROAD ,BASAI GGN HR	DOA	16-Dec-2025 01:08 PM
		TILL DATE	26-Dec-2025 04.24 PM
Age/Sex	5 Days / Male	Discharge Type	
Consultant Name	Dr. Mohit		
Contact No.			
Department/Speciality	PEDIATRICIAN & NEONATOLOGIST		

### DIAGNOSIS

Cyanotic CHD / Single ventricular physiology / Hypoplastic right heart / Duct dependent pulmonary circulation / Post op PDA stenting (13/12/2025) At Fortis Hospital / RD.

### PRESENTING COMPLAINTS

Diffuclyt in breathing on IPPV support  
Sepsis on IV antibiotics

### HISTORY OF PRESENTING ILLNESS

FT / AGA / 2.73KG / Male / LSCS / CIAB / Respiratory Distress / CCHD / TA/PA with duct dependent pulmonary circulation / CONFLUENT PAS Outborn on 12/12/2025.  
PDA stenting done on 13/12/2025 at Fortis Hospital.

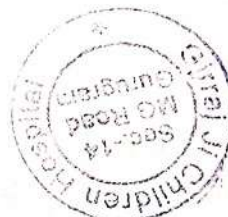

### EXAMINATION FINDING

GC: Sick  
CVS: S1S2 +, Continouus murmur+, On Inotropic support Inj Dopa @ 0.5ML/HR  
RS: On Ventilatory support BIPAP@ 22/07/50%  
Abd: Soft, non-tender  
CNS: Under sedation.

### COURSE IN THE HOSPITAL

- \* Baby admitted for post-op care with respiratory distress; on IV antibiotics.
- \* Baby on mechanical ventilation: BiPAP at 22/7, FiO2 50%, and on inotropic support with dopamine at 0.5?ml/hour.
- \* Blood investigations revealed raised CRP (22.92 mg/L). On repeat septic screening, CRP initially increased and then decreased, with the last value being 12.24 mg/L.
- \* Managed with IV Antibiotics, IV Inotrops support, IV steroids, IV Calcium, nebs and other supportive treatment.
- \* As respiratory distress and FiO2 requirement decreased, the baby was shifted to NIPPV on day 6 of admission. Distress further settled, and the baby was shifted to HHHFNC on day 8. High-flow support was gradually weaned and stopped; however, the baby could not maintain saturation. At present, the baby is on free-flow oxygen at 1 L/min, maintaining saturations of 80–85%.
- \* Baby was kept NPO and started on IV fluids due to critical state and respiratory distress. As distress settled, OG feeds were started at 5?ml every 2?hours and gradually increased as tolerated. Currently, the baby is on full oral feeds and tolerating well, with normal urine and stool output.
- \* Currently on Free flow @(1 L O2), Oral feeds 40 mL 2-hourly,
- \* Baby required continuous IV treatment, free-flow O2 support, and NICU care.

Dr. Mohit Kumar Agrawal

### COST ESTIMATE LETTER

**Date:** 28/Dec/2025

**To,**

The Founder,  
Hope and life foundation,  
Delhi

This is to certify that **Patient Baby of Hema**, 5day old male child, is a case of **Cyanotic CHD / Single Ventricular Physiology / Hypoplastic right heart,/ Duct Dependent Pulmonary circulation / Post op PDA Stenting**.

**At:** Firoz Gandhi Road , Gurugram , Haryana

This patient is admitted in our esteemed hospital NICU. **UHID : 20/00 13723**. Since dated **16/12/2025, 01:08 PM.** is receiving treatment under **Dr. Mohit** and is in need of financial assistance.

### SOCIAL ECONOMIC EVALUATION OF THE FAMILY:

Child born in Fortis hospital and shifted to our hospital further treatment. Doctor has suggested long hospital stay with multiple investigations and costly medicines with close monitoring.

Patient's father is working as a Barber and earns a nominal income. Mother is a housewife. Family has been spending continuously for child's treatment. Due to that, they cannot afford child's treatment. So, kindly give maximum financial help to this patient.

**Monthly Income:** Father Rs. 18,000/-

**Mother:** Housewife

**Dependents:** 3

The expenses incurred so far by the parents on treatment: **Rs. 2.40 lakh** for child's treatment.

The expected cost for the treatment would be **Rs. 2.40 lakh** further treatment.

Thanks

Girraj Ji Children Hospital
